PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/584,051	<b>Applicant(s)</b> DIETZ ET AL.	
	<b>Examiner</b> MARK J. BEAUCHAINE	<b>Art Unit</b> 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 06 November 2008.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-81 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-81 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 22 June 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Specification***

Receipt of the amendment to the specification filed 6 November 2008 is acknowledged. Said amendment is accepted.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10, 24-29, 31-38, 40-50, 58, 61-66, 68, 69 and 71-81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Patent Application Publication Number US 2002/0035541 A1 by Makino et al ("Makino") in view of Patent Number 5,311,562 by Palusamy et al ("Palusamy"). The banknote processing machine system disclosed by Makino comprises banknote processing machines 3a-3n that are connected to service center 2 via network Dnet (see Figure 1) which comprises the Internet (see paragraph 0066). Machine operation software preset data are exchanged from said service center to said machine and replace data in said banknote processing

Art Unit: 3653

machine via said network using a standard protocol to adjust and control said machines (see paragraphs 0062, 0063 and 0082-0091).

Makino further discloses said banknote processing machines being connected to one another and data being exchanged between said machines (see paragraph 0107), monitoring unit 4 that has an operator assigned to monitor said machines (see paragraph 0068), and machine data being stored in data memory DB of said service center 2 which evaluates said data (see paragraph 0098). Still further, said machines send fault reports to said service center and are displayed via an input/output device (see paragraph 0138), banknote machine data is backed-up prior to an exchange of data to into said machine (see paragraphs 0004 and 0157), and fundamental parts of machine data V-Rom (see Figure 2) cannot be altered by exchange data.

Said system further discloses an alarm message that is generated as a result of exchange data and is sent to a processing machine (see paragraph 0138, lines 22-30), and machine log files (see paragraph 0076).

Makino fails to disclose said log files being evaluated to effect machine repairs. Palusamy teaches a machine system comprising machines 34 being monitored by service center 102 via a network (see Figure 2) such that log files regarding the status of said equipment are maintained and evaluated to cause repairs to be carried out prior to failure (see column 3, lines 60-68; column 4, lines 8-20; column 6, lines 1-10; column 7, lines 1-9 and 52-68; and column 8, lines 39-46) for the purpose of reducing the cost and time of non-operation of equipment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the file evaluation

Art Unit: 3653

configuration of Palusamy into the network of Makino for the purpose of reducing the cost and time of non-operation of said machines.

Claims 11-20 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Makino in view of Palusamy as applied to claim 1 above, and further in view of Patent Application Publication Number US 2002/0046061 A1 by Wright et al ("Wright"). Makino/Palusamy fails to disclose departments being connected to said service center. Wright teaches a communication network comprising departments 326A-326D that are connected to and are in data communication with service department 120 that is operated by a service person (see Figure 3 and paragraph 0054) for the purpose of transmitting specific data to and from said service center. It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the department/service center configuration of Wright into the system of Makino/Palusamy for the purpose of transmitting specific data to and from said service center.

Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Makino in view of Palusamy as applied to claim 1 above, and further in view of Patent Number US 6,508,398 B1 by Estes ("Estes"). Makino/Palusamy fails to disclose a further network-connected service center. Estes teaches a banknote processing machine system comprising service center 30 and further service center 68 that are in communication with banknote processing machine 36 (see sole figure, column 2, lines 11-24, and column 3, lines 5-19) for the purpose of enhancing data transfer to and from

Art Unit: 3653

said banknote machine. It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the further service center of Estes into the system of Makino/Palusamy for the purpose of enhancing data transfer to and from said banknote machine.

Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Makino in view of Palusamy as applied to claim 1 above, and further in view of Patent Number US 7,092,907 B2 by Kanevsky et al ("Kanevsky"). Makino/Palusamy fails to disclose a trial version of transferred data. Kanevsky teaches a data transfer system having including a trial version of data for a processing machine that is transferred from a service center (see column 1, lines 51-56 and column 2, lines 30-39) for the purpose of determining the effectiveness of said data in the operation of said system. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the trial version of data of Kanevsky into the system of Makino/Palusamy for the purpose of determining the effectiveness of said data in the operation of said system.

Claims 30, 53-57 and 67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Makino in view of Palusamy as applied to claim 1 above, and further in view of Patent Number US 6,430,470 B1 by Nakajima et al ("Nakajima"). Makino Palusamy fails to disclose the charging of a data transmission fee. Nakajima teaches a banknote processing machine network system that operates to charge a fee for data

Art Unit: 3653

transmitted to banknote processing machines (see column 4, lines 28-38) for the purpose of generating revenue for the system operator. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the transmission fee charge of Nakajima into the system of Makino/Palusamy for the purpose of generating revenue for the system operator.

Claim 39 is rejected under 35 U.S.C. 103(a) as being unpatentable over Makino in view of Palusamy as applied to claim 38 above, and further in view of Patent Application Publication Number US 2004/0164141 A1 by Egami et al ("Egami"). Makino/Palusamy fails to disclose the monitoring of a person. Egami teaches a banknote processing machine that monitors the presence of a person via camera 6 (see Figures 1A and 2A and paragraph 0035) for the purpose of verifying the identity of persons operating said machine. It would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the monitoring operation of Egami into the banknote machine of Makino/Palusamy for the purpose of verifying the identity of persons operating said machines.

Claims 51 and 52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Makino in view of Palusamy as applied to claim 1 above, and further in view of Patent Number US 7,395,241 B1 by Cook et al ("Cook"). Makino/Palusamy fails to disclose an authorized source check. Cook teaches a banknote data transfer system that is arranged to check whether data to be exchanged originate from an authorized

Art Unit: 3653

source (see column 8, lines 29-50) for the purpose of providing secure monetary data transactions. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the authorized source check of Cook into the system of Makino/Palusamy for the purpose of providing secure monetary data transactions.

Claims 59 and 60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Makino in view of Palusamy as applied to claim 58 above, and further in view of Patent Number US 6,363,164 B1 by Jones et al ("Jones"). Makino/Palusamy fails to disclose banknote comparison data. Jones teaches a banknote system comprising processing machines that generate banknote data via service center 930 (see Figure 4a and column 20, lines 48-67) for the purpose of determining the authenticity of banknotes processed by said machine. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the comparison data of Jones into the system of Makino/Palusamy for the purpose of authenticating banknotes processed by said machine.

Claim 70 is rejected under 35 U.S.C. 103(a) as being unpatentable over Makino in view of Palusamy as applied to claim 69 above, and further in view of Patent Application Publication Number US 2001/0051884 A1 by Wallis et al ("Wallis"). Makino/Palusamy fails to disclose a replacement part request. Wallis teaches a currency processing network that operates to request an operator to deliver

Art Unit: 3653

replacement parts (see paragraph 0009) for the purpose of permitting the repair of articles associated with said network. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the replacement part request of Wallis into the system of Makino/Palusamy for the purpose of permitting the repair of articles associated with said system.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-81 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3653

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MARK J. BEAUCHAINE whose telephone number is (571)272-6934. The examiner can normally be reached on 8:00AM through 5:00PM Mondays through Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick H. Mackey can be reached on (571)272-6916. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
